

Join the IT Revolution

▶ InSequence is looking for talented individuals to help make technology easy-to-use

InSequence believes that people should not need extensive expertise in managing Information Technology infrastructures in order to benefit from the capabilities and cost efficiencies of a large organization. InSequence seeks to revolutionize the IT industry by placing technology into the hands of people with easy-to-use interfaces at drastically reduced costs.

InSequence is specifically interested in talking to self-motivated and creative engineers with four year college degrees in the following disciplines:

- ▶ Computer Engineering
- ▶ Electrical Engineering
- ▶ Computer Science
- ▶ Information Technology
- ▶ Mathematics

What sets us apart from the pack?

InSequence leverages the engineering best practices proven through our nation's highest technological achievements – the space program, communications and imagery satellites, and the internet – to bring you practical, cost-effective solutions that you and your business can rely on.
